The whole issue of PI's, however, undoubtedly deserves a more comprehensive look than isolating on the DIA positions for NPIC. We are preparing now a memorandum for Admiral Turner addressed to CIA and DIA announcing that a study team will review the entire national photo-interpretation resources in CIA and DIA to determine if there are areas of overlap or duplication which can be eliminated, thereby freeing manpower resources to satisfy the growing PI need. We propose that the study group be chaired by the IC Staff with representation from DIA and CIA.

NOTE FOR: Comptroller

SUBJECT: NPIC

Jim:

25X1

1. Bill Miller called me this evening to report his concern about continuing DOD failure to ante up positions for NPIC. He wondered if it would be a good solution for the Committee to add slots to CIA's authorization as a way of making up the requirement. I said that if I had more positions assigned to CIA I am sure I would put them all to NPIC and I know the DOD is faced with very difficult decisions growing out of their continuing need to reduce.

2. Still, take a quick look at the Miller proposition, let me know what the Agency reaction is and tie-in with the IC Staff.

Director of Central Intelligence

l. I really enjoyed my visit to NPIC. John Hicks and his people were most helpful.

2. One point that came up in which I would appreciate more
information on, is how we divide up the exploitation between the
facilities to whom the photography is distributed. Specifically,
who are thefacilities and are there more on occasion? Beyond
that, does all photography go to all 📑 If not, how do we
allocate it? Clearly, some extensive amount of overlap in analyzing
photography is desirable because of different points of view. How
do we determine how much overlap is desirable and affordable?
